

Bug Report

Team Slugstras

Release Name: SlugPath v1.0.0

Release Date: 03/22/18

Revision 1.1 (03/11/18)

Release v1.0.0

[1.1]: My Locations function only works with limited devices and browsers. Devices vary upon GPS accuracy, and browsers depends whether or not it supports Non-Secured web pages to allow access to user location.

[1.2]: Some paths from our data are not directly on top of the paths on the Leaflet API Map, but inaccurate paths are still walkable.

[1.3]: Some paths assume access through key protected buildings, in which shows paths through buildings that users may or may not have access to.

[1.4]: Estimated time till arrival and distance do not disappear if dropdowns are changed.

[1.5]: Locations with the same coordinates, do not show two different map markers.

[1.6]: Special characters (i.e. ‘) do not show on some browsers.

[1.7]: Broken images on the About Us page may result in improperly-spaced text.
